Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election with traverse of 1-7 and 28-30 in the reply filed on 8/12/05 is acknowledged. Claims 1-7 and 28-30 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 7 and 28-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Liu (US 5,953,005).

4. As per claims 1, 3, 5 and 7, Liu teaches the invention as claimed including a system for synchronizing and serving multimedia content in a distributed network environment the system comprising:

a synchronization server [76a-c, Fig. 1; col. 3, lines 53-64];

a content server [72, 74a-e, Fig. 1; col. 3, lines 35-42];

a plurality of clients, wherein the synchronization server provides a indication of an update to a multimedia resource to the clients, and the content server provides content information to the clients based upon the indication provided by the synchronization server [col. 2, lines 17-33; col. 3, line 65 – col. 4, line 12; col. 5, lines 50-57].

5. As per claim 2, Liu teaches the indication includes location information for an updated multimedia resource [col. 3, lines 43-44].

6. As per claim 4, Liu teaches the distributed events being processed by the synchronization server in the order received by the synchronization server [col. 6, line 51 – col. 7, line 34].

7. Claims 28-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Richard et al. (US 6,162,060).

8. As per claim 28, Richard teaches the invention as claimed including a computer-implemented virtual course system adapted to a distributed network environment, the course system comprising of a content server providing course-related information [102, Fig. 1; col. 4, lines 25-29]; a plurality of clients adapted to exchange information with the content server [124D-F, Fig. 1; col. 4, lines 49-51]; and a synchronization server [106A-C, Fig. 1]; wherein the synchronization server provides an indication of an update to the

course-related information to the clients, upon which at least one client sends a request for updated course-related information to the content server and the content server provides the updated course-related information to the at least one client in response to the request [col. 4, lines 49-65].

9. As per claims 29 and 30, Richard teaches the course-related information comprises at least information on a virtual whiteboard and at least one of the following: a course catalog, and course instructional materials [col. 6, lines 21-35].

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Liu (US 5,953,005) as applied to claims 1-5 and 7 above.

12. As per claim 6, Liu teaches the invention substantially as claimed in claim 1. Liu does not specifically teach the shared resource is updated by one of the plurality of clients in real time. However, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to include the step of updating the share

resource by one of the plurality of clients in real time because doing so would enable the client share his/her multimedia file with the other people who have the same interest. One of ordinary skill in the art would have been motivated to modify Liu's system with the updating step for increase the dynamic capability of the system.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Fukasawa (US 6,567,844), Boyer (US 5,896,128) and DeMoney (US 6,064,379) disclose sharing multimedia file on-line.
